

OH DEER

The Town is asking residents to not feed deer that may be visiting your property. It can be exciting to see nature up close, but deer have plenty of food in their natural environment.

A few tips to discourage deer from coming onto your property:

- Do not feed deer either intentionally or otherwise.
- Erect fencing adequate to prevent access to areas of high interest. For example: small gardens and flower beds.
- If possible, safely scare deer away with loud noise, sprinklers or garden hose.
- Maintain your landscape. Trim densely planted areas that will discourage deer from grazing in your yard.
- Keep deer attracting plants closer to your home. Even hungry deer are reluctant to come close to your home.
- Select plants that are less attractive to deer.

If you know there are deer in and around your home, remember to drive with caution through your neighbourhood especially during early morning and late evening hours.
