

Home Cleaning Information

Cleaning Products:

Disinfect with household cleaning products OR a solution of 1-part bleach to 9-parts water. The bleach solution needs to be mixed daily to be effective.

High-Touch Surfaces:

Ex: doorknobs and locks, light switches, railings, appliance handles, faucets, toilets, and tabletops

Clean high-touch surfaces once a day or more if needed.

1. First wash high-touch surfaces with soapy water.
2. Then disinfect with cleaning products.

High-Touch Objects:

Ex: phones, video game and remote controls, computers, handheld devices, keys, bags, purses, and backpacks

Clean high-touch surfaces once a day or more if needed.

1. Disinfect high-touch hard objects with 70% alcohol or wipes.
2. Launder soft surfaces according to directions.

Groceries:

It is not necessary to sanitize your groceries because the risk of COVID-19 infection is low.

1. Always wash your hands before handling, preparing, and eating food.
2. Wash fresh fruit and vegetables prior to eating as you would normally.

EXTRA STEP : If you wish to, use water and bleach solution above to spray down any packaged items. Take care with cardboard packages which may absorb the solution.
